Group 3 Project Update #3

Brenden Granzo, Ryan Jablonski, Evan Dean, and Quadri Jubril

Project Roadmap

- Sprint 1: ✅
  - Preliminary project activities and deliverables outlined, basic UI created
- Sprint 2: ✅
  - Github repository connected to Vercel website, project set up in Supabase, and key database components outlined
- Sprint 3: ✅
  - UI code refactored and QR code scanner implemented, UI 80% complete
- Sprint 4: ✅
  - Complete UI, build out database, and create support page for ticketing system
- Sprint 5:
  - Complete database, implement mobile styling, and investigate additional features
- Sprint 6:
  - Run all tests to ensure system viability, review failed tests, and create system demonstration

Current Status

- UI completed
  - Designed and implemented reusable UI components
- Support page for ticketing system created
- [Link to site](#)

Next Steps

- Develop CRUD operations for interaction with database
- Populate database with dummy data to demonstrate functionality
- Link support page to Todoist via an API
  - This will allow non-admin users to submit support/repair tickets
- Implement mobile styling
- Investigate new features for future sprints
