Group 3 Project Update

Brenden Granzo, Ryan Jablonski, Evan Dean, and Quadri Jubril

Project Overview and Roles

<u>Overview</u>:

- Title: *Developing an ITAM System for a Mid-Sized Company*
- Summary: we will create a system that will utilize maintenance schedules, QR code integration, ticketing systems, and automation to effectively manage the IT assets of an organization throughout their respective lifecycles

<u>Roles</u>:

- Evan Dean: PM and DB architect
- Ryan Jablonski: tech lead
- Quadri Jubril: quality assurance
- Brenden Granzo: documentation/reporting

Current Status

- React project is set up and deployed to Vercel
  - GitHub is up-to-date
- Supabase Auth is 99% set up
  - Need to reconfigure sign-up process
  - Otherwise able to log-in and view active session data
- UI components are in progress
  - Home/Dashboard page
- Link to site

Next Steps

- Build out database based on existing ERD document
  - Then connect app to database to work with live data instead of hard-coded data
- Need to develop…
  - Remaining pages/UI components
  - QR Code creation/scanning feature
  - Some sort of ticketing system when users need support
