Group 3 Project Update #5

Brenden Granzo, Ryan Jablonski, Evan Dean, and Quadri Jubril

Project Roadmap

- Sprint 1: ✅
  - Preliminary project activities and deliverables outlined, basic UI created
- Sprint 2: ✅
  - Github repository connected to Vercel website, project set up in Supabase, and key database components outlined
- Sprint 3: ✅
  - UI code refactored and QR code scanner implemented, UI 80% complete
- Sprint 4: ✅
  - Complete UI, build out database, and create support page for ticketing system
- Sprint 5: ✅
  - Complete database, implement mobile styling, and complete Todoist integration
- Sprint 6: ⊟
  - Run all tests to ensure system viability, review failed tests, and create system demonstration

Current Status

- Assets can be added via the UI
- QR Codes are now created when assets are made
- Software License can be added and assigned via the UI

Next Steps

- Evan - Continue filling in the database
- Quadri - Test features as they are developed
- Ryan - Connect UI to DB as data is populated, enhance/fix features when feedback is given
- Brenden/All - Start planning out and filling in the poster
